Summary

Backend professional with 2+ years of experience in the **BFSI** (Banking, Financial Services, and Insurance) industry, specializing in end-to-end API design and delivery that connects internal systems with third-party vendor platforms. Leads cross-functional delivery – coordinating QA, DevOps, and business teams from technical design through production rollout for major insurance clients – consistently shipping ahead of schedule with a **98%** client satisfaction rate. Directs a **10**-person engineering team through code reviews and day-to-day delivery execution.

Languages & Technologies

Languages/Core: Java, SQL (PostgreSQL), Data Structures & Algorithms, Object-Oriented Programming (OOP)
Frameworks/Backend: Spring Boot 3, Spring MVC, Spring Security, Hibernate ORM, Microservices Architecture
Cloud/DevOps: AWS (EC2, S3, Lambda, IAM, SNS, CloudWatch, Polly, Bedrock), Docker, Git, CI/CD, Maven
APIs/Web: RESTful APIs, Swagger/OpenAPI
AI/GenAI: AWS Bedrock, LLM API integration (ElevenLabs, Sarvam AI)
Tools/Practices: Postman, Agile/Scrum

Work Experiences

Tata Consultancy Services — June 2024 – Present

Backend Developer (System Engineer) — *Kolkata, India*

- Architected and deployed a database-agnostic **Health Insurance module** reused across BaNCS projects, standardizing core business logic and reducing new-module setup time by **90%** for a portfolio of BFSI clients.
- Built and refactored **RESTful APIs** and legacy **Java** services – optimizing database queries, caching, Spring Boot and Angular integrations – to improve data processing speed by **25%**, cut API latency by **30%**, and reduce memory consumption by **15%**.
- Delivered mission-critical insurance functionality for major BFSI clients including **SBIG, FGI, and PHI** as part of a broader legacy-to-microservices migration, contributing to a **40% improvement in system uptime**.
- Directly drove **PHI** go-live readiness and **Indian market launch**, delivering the **Reinsurance module** end-to-end and providing multiple onsite support engagements at the client site, consistently releasing **15% ahead of schedule** while maintaining a **98% client satisfaction rate**.
- Led a **cross-functional team of 10 engineers** on the PHI project, owning technical design, code reviews, development, and production delivery while ensuring engineering quality and alignment with business requirements.

Projects

SpeakIT: Speech/Voice Conversion Platform | Spring Boot, AWS, ElevenLabs, Sarvam — March 2026

- Architected a distributed TTS service leveraging **AWS Polly**, **ElevenLabs AI**, and **Sarvam AI** to support real-time audio synthesis across **20+ languages** with sub-200ms processing time.
- Engineered an event-driven cost control pipeline using **AWS Lambda, SNS, and Budgets** to automate IAM policy enforcement, preventing budget overruns through real-time threshold monitoring.
- Containerized the application using **Docker** and deployed on **AWS EC2**, ensuring environment consistency and scalability. **GitHub**

Self-Hosted Private Cloud Infrastructure | Oracle OCI, Coolify, Docker, Tailscale — June 2026

- Provisioned cloud infrastructure on **Oracle Cloud Infrastructure (OCI)** and used **Coolify** for declarative configuration management, orchestrating **15+ containerized microservices**.
- Achieved **zero public port exposure** by implementing a zero-trust network via **Tailscale**, and enforced strict **Role-Based Access Control (RBAC)** across all administrative tools.
- Automated disaster recovery with an idempotent **Bash** provisioning script and scheduled **PostgreSQL** backups, achieving **99.99% data durability** and **zero manual intervention** on recovery after outages.

Education

Kalinga Institute of Industrial Technology (KIIT) — August 2022 – July 2024

Master of Computer Applications (MCA) – CGPA: **9.04** — *Bhubaneswar, India*

Malda College — August 2019 – August 2022

B.Sc. Mathematics (Hons.) – CGPA: **8.92** — *Malda, India*

Achievements

- Awarded for contribution to the API Automation suite at TCS, now a standard tool for internal QA teams.
- Successfully managed end-to-end delivery of high-impact features for international health insurance clients, maintaining **100% SLA compliance**.
